

Which Birds Visit Your Yard?

Directions: For 7 days observe which birds visit your yard. Make a tally mark each time you see one. You might see the same type of bird more than once. Record that one too. Record the locations where you spotted each bird- was it on the ground, tree, under a bush, on the birdfeeder, etc.?

After the week, tally which bird species visited you the most. You may want to research what type of nest they build, what they like to eat, and other facts you wish to know.

Bird	Location	Tally
Finch		
Robin		
Downy Woodpecker		
Chickadee		
Cardinal		
Wren		
Kinglet		
Sparrow		
Blue Jay		
Nuthatch
